

Warfield Grow and Share - Welcome Pack

Emergency Procedure

If there is an emergency on site (accident, fire or other incident) DO NOT PHONE 999.

Telephone Syngenta - 01344 413799

They will then contact appropriate emergency services

Contacts

Claire (chair of our group) - 01344 302708/07876 791712

David Putt (site project manager) - 01344 382936/07867 695931

Syngenta security (for problems with security gate or barn alarm going off) - 01344 414433

Toilets

There are toilets in the welfare room (near the pond). There is a key safe on the fence to left of the door. You need to type in 0786 to open the safe for the key. When leaving the door should lock when pulled to. Make sure key safe is locked up again when you have finished.

First aid kit is in the polytunnel (decking end).

Barn

If the barn shuttering is down DO NOT try to enter. Barn is alarmed. Syngenta security need to be alerted if you hear it go off.

Gate

Last one out must shut both the inner and outer gate.

Tools

There are a few tools in the shed but generally best to bring your own.

Diary

We keep a book in the greenhouse. One end has log of jobs done by people when they visited. Please write in what you have done.

Upside down at other end is a jobs to do list. Cross it off if you have done a job.

Watering

We have a watering rota that you will be added to. Minimum is to water the greenhouse and the poly tunnel (our bench).

If you have more time check the diary to see what has been watered recently and try and cover another area so we share the load, especially during hot spells.

If you use the hose please turn tap off before leaving.

We pledge to help water the community growing plot when required.

During hot spells when you turn up please open the poly tunnel doors (and our greenhouse). If you are the last one there then shut them on leaving.

Plot Plan

We have a plan of the plot showing the numbered beds. We try to practice some kind of crop rotation as good growing practice each year. The plan is in the greenhouse.

The planting diary often refers to the bed numbers for planting into.

Compost Heap/Manure

We have four compost heaps on far side of the plot. Please top these up but **DO NOT PUT WEEDS ON THAT HAVE RUN TO SEED PLEASE!**

Next to these is a weed heap for weeds that have run to seed and perennial weeds such as dandelions, thistles and convolvulus that will readily re-grow from a bit of root.

We have use of cow manure that comes from the Syngenta farm. It is not all for us so please be considerate in use as other groups also need it.

Seeds and Sundries

Veg seeds are kept in the metal box in greenhouse. Salads and herbs are in cardboard box.

Pens, pencils and labels are in the plastic box.

There are some small plastic bags if you want to cut any 'cut and come again' salads.

There are some scissors, string and a pair of secateurs on the shelf too.

Fleece, net and hoops are either in the greenhouse or in the yellow roll top plastic container near the gate.

Enjoy Your Growing
